Main Street (Route 122A) Reconstruction Project Presentation
South Grafton Elementary School
March 31, 2016, 7:00 PM

The Town of Grafton is holding a public forum to solicit comment on the reconstruction of Main Street (Route 122A) from the Sutton Town Line to Providence Road. Main Street was the first accepted road in Grafton and supported economic development in South Grafton. The project is approximately 2.05 miles in length and consists of new sidewalks with improved handicap accessibility, new and reset granite curbing and a reconstructed/resurfaced roadway with bicycle accommodating shoulders. Minor intersection realignments and drainage system improvements are also proposed.

The planned improvements to Main Street will enhance and improve access to the three historical mill villages within South Grafton and support opportunities for economic development along the corridor. Residents and businesses along the project corridor are encouraged to attend to learn about the project and to help shape the future of Main Street. Please contact the Grafton Planning Department if you have any questions (508-839-5335 x1120; planningdept@grafton-ma.gov).
